

PO Box Rental API — one open question

To	Emirates Post PO Box API team
From	7X — NXN conversational assistant
Environment	<code>https://box-stg.emiratespost.ae/services/pobox</code> (staging)
Date	30 August 2026

The rental flow works end to end against staging — availability, hold, order creation. One question remains, plus a few behaviours we'd like confirmed. All of it is from live calls, using the customer's own UAE PASS session token.

The question: `Save` opens its own payment

`Rental/Save` succeeds and returns a hosted payment page on **your** N-Genius outlet:

```
200 OK
{ "payload": {
  "orderNo": "260961742",
  "paymentGatewayResponse": {
    "paymentUrl": "https://paypage.sandbox.ngenius-payments.com/v2?code=...",
    "referenceNumber": "8ce8f91b-c278-4068-b15b-b6a2da48e0ec",
    "niOrderResult": { "outletId": "b78ef8c7-ce2a-41d6-84c9-e6219557a991",
                      "state": "STARTED" }
  }
}
```

We take payment on **our own** N-Genius outlet, so yours is never settled:

```
POST /api/v1/Rental/UpdatePayment/8ce8f91b-c278-4068-b15b-b6a2da48e0ec
200 OK
{ "payload": { "orderNumber": "260961742",
               "isPaymentSuccess": false,
               "paymentStatus": 2,
               "paymentDetails": { "amountPaid": 0.0, "paymentRefNo": null },
               "transactionDetails": { "poBox": "450358" } } }
```

The rental record exists and the box is reserved, but **it does not appear in the customer's portal** — presumably because your order is unpaid.

What we need to know:

1. Can a rental be recorded as **already paid** — a flag, another endpoint, or a payment reference we can pass in?

2. If not: should the customer pay on the `paymentUrl` you return, and should we poll `UpdatePayment/{referenceNumber}` until `isPaymentSuccess` is `true` ?
3. How long after payment does `isPaymentSuccess` flip? We need to know how long to wait before telling a customer anything.

Three behaviours we found by trial — please confirm they're intended

Finding	Why it matters
<code>Select</code> needs <code>uniqueBoxId</code> from <code>FreeBoxes</code> (<code>2450063</code>), not <code>boxId</code> (<code>450063</code>). <code>boxId</code> returns <code>108 BOX_NOT_FREE</code> .	Reads as "someone took it", so we told customers boxes were unavailable when they were free.
<code>paymentProperties.billingDetail</code> is optional in the spec, required in practice — all six fields . Omitted → <code>400 {"Error":"Error from payment gateway"}</code> . Partial (name + email only) → <code>400 ... 157 ERROR_GETTING_HOLD_DETAILS</code> .	Neither error names the missing field, and the second points at the hold, which isn't the problem. This cost us a day.
<code>UpdatePayment</code> takes <code>paymentGateWayResponse.referenceNumber</code> . <code>niOrderResult.reference</code> — also a UUID, same response — returns <code>500</code> .	Two UUIDs side by side with nothing to tell them apart.

Working sequence, for reference

Rental/Bundle	<code>request=P</code>	(not <code>EmirateCode</code>)
Rental/BoxLocations	<code>BundleId=IN, EmirateCode=DXB</code>	→ <code>officeId</code> per branch
Rental/FreeBoxes	<code>BundleId=IN, LocationId=<officeId></code>	→ { <code>uniqueBoxId</code> , <code>boxId</code> }
Rental/ExpiryDates	<code>BundleId=IN</code>	→ exact date strings
Rental/Select	<code>bundleId, uniqueBoxID, poBoxExpiryDate</code>	→ <code>subscriptionReferenceNumber</code>
Rental/Save	<code>subscriptionReferenceNumber, totalAmount, userProfile, paymentProperties.billingDetail</code>	

- `poBoxExpiryDate` must be copied **verbatim** from `ExpiryDates` , offset included (`2027-08-29T00:00:00+00:00`). Recomputing it returns `400 "Invalid date value."`
- `LocationId` is the branch's own `officeId` , not `mainOfficeId` — Naif is `214 / 209` , and `209` returns an empty list rather than an error.
- `Rental/Save` takes **~17s**; `Select` under 1s. Expected?
- `FreeBoxes` returns 401 with the API key alone — it needs a customer session.

We previously raised `157 ERROR_GETTING_HOLD_DETAILS` with you. That was ours — an invented reference, a stale hold, and the partial `billingDetail` above. No action needed.

Reservations left stranded by testing

Please release if they don't expire on their own — all Dubai:

- **Held, no order:** 378781, 378785, 378790 (Naif) · 449691, 449949, 449989, 450000 (Al Barsha)
 - **Order created, unpaid:** 449922, 449997, 450063, 450152, 450358, 450364, 378797 (Al Barsha) — orders 260961732, 260961735, 260961736, 260961739, 260961740, 260961741, 260961742
-

Happy to walk through it on a call.
